

Final Project Description

Expanding The Photo Gallery

- In an earlier assignment you added the ability to hover over images to display their src and alt text
- Expand upon this so that
 - you use at least six of your own images and
 - incorporate tab index as well.
- You must not change the HTML to add tabindex— you must use javascript iteration to add the attribute
- You must add the focus and blur events so that keyboard users have the same capabilities as mouse users.

General Guidelines

- Use your own images – preferably unique images
- Validate everything!
 - Use W3, Wave, and aXe
- Do your peer grading with compassion
 - Leave helpful comments
